## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see filed 1/10/2008, with respect to USC 103 rejections have been fully considered and are persuasive. The USC 103 rejection has been withdrawn.

The Examiner encourages the applicant to modify the claims according to the USC 112 rejections that follow to clarify the claims. The Examiner also encourages the applicant if the applicant desires, to contact the Examiner or to leave a message, to discuss the claims. The Examiner is also willing to make an Examiner's amendment after authorization from the applicant to allow the claims over the prior art of record.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The independent claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2134

As per claim 1, It is unclear if updating the key-table “according to the encrypted data” means the key is included in the encrypted data, or a key is updated corresponding to the encrypted data. The examiner suggests a slight change in phrase, or in the alternative, changing "according to the encrypted data" to "with the decryption key corresponding to the encrypted data from a master key-table”. This would clarify the claim and put it in condition for allowance.

As per claim 10, It is unclear, if updating the key table is from the encrypted data in a similar manner to claim 1. Claim 10 also appears to be missing the step of searching the key table for the correct decryption key. The applicant also uses the word “through” on line 21, this does not appear to be relevant to the claim, and may be eliminated.

As per claims 16, and 20, Claims 16 and 20 update the key table according to “the decryption data”. There is no other “decryption data” in these claims. It is unclear if the applicant means, encryption data, along the lines of claim 1, or corresponding to encryption data, or updating according to a decryption key from a master key-table. It would be helpful for clarity’s sake on the last line to insert "updated" prior to “decryption key”, as has been done in claim 1.

***Allowable Subject Matter***

Claims 1-21 would be allowable if the USC 112 rejections were overcome.
